

This graph shows the results students obtained at state and national competitions during the last five years. It reflects ONLY the places (1, 2, and 3), not the dozens blue ribbons the obtained.

When compared to the largest school from IACS, our rather small school has great results. Last year, 60 of their 425 students (possible contestants) obtained Blue Ribbons (21%), while 43 of our 90 possible contestants obtained Blue Ribbons (48%), not to speak of places.
